

PRODUCTS	BENEFITS	APPLICATIONS	BASE	BASE OIL	NLGI GRADE	OPERATING TEMP. RANGE °C
HSG 9035 Premium	<p>Dynamically light grease. Has excellent stability to oxidation and corrosion. Does not harden or form residue. Good resistance to Mechanical working without significant loss of consistency. Very high speed factor of one million. Resists oil separation & does not get thrown off in bearings operating at high speeds. Excellent pliability at low temperatures of - 55°C (-67°F). Ideal product to be used where high speed and low temperatures as well as varying temperatures are present, and where minimum friction or low torque is required along start up and running in.</p>	<p>Ball bearings, cylindrical roller bearings, conical roller bearings, needle bearings. For small size wiper motor and other assemblies in automotives. For use in spindles, vertical milling cutters, for all wood working operations, small bearing, cams, joints, engines, turbi</p>
